

NEXAT Joins Farming Simulator 25 – The Wait is Over!

Figure 1: NEXAT with NEXCO in Farming Simulator 25

Rieste, Germany (February 11, 2025): Over the past three years, one question has appeared in farming forums and social media: "When is NEXAT coming to Farming Simulator?" Today, we are beyond excited to finally reveal: NEXAT is officially coming to Farming Simulator 25 as a dedicated Pack! Starting now, pre-orders are open, and on March 11, 2025, the revolutionary NEXAT system will be available for PC, Mac, PlayStation®5 and Xbox Series X|S.

FROM A REVOLUTIONARY IDEA TO PRACTICE – A NEW ERA BEGINS

Winning the DLG Innovation Award 2022 with the Gold Medal was a milestone for us. One year later, we presented our system to the public for the first time at Agritechnica 2023. Millions of visitors marveled at our carrier vehicle NEXAT and our harvesting module NEXCO, the largest combine harvester in the world, in full size. Agritechnica 2023 was a dream come true for us. For the first time, we introduced our groundbreaking agricultural system to the public. Millions of visitors witnessed the NEXAT carrier vehicle alongside our NEXCO harvesting module, the world's largest combine harvester, in all its glory. But while the agricultural industry marveled at our innovation, someone else was taking a closer look: GIANTS Software, the creators of Farming Simulator. From our very first conversations, it became clear that we needed to answer the community's frequently asked question: "When is NEXAT coming to Farming Simulator?"

Today, we can finally say: **It's happening!**

MORE YIELD, LESS WORK – EXPERIENCE THE NEXAT ADVANTAGE

The NEXAT Pack doesn't just introduce our carrier vehicle to the game -it brings a full suite of cutting-edge implements from some of the industry's leading manufacturers. Get ready for 12 machines from 7 different brands! Alongside NEXAT, you'll find top-tier equipment from Einböck, Geringhoff, and Väderstad. Plus, DAMMANN, Evers Agro, and Wienhoff are making their Farming Simulator debut with us.

The NEXAT system is built for maximum efficiency, and now you can experience it in-game:

- **One pass, multiple tasks** – cultivate, seed, and fertilize in a single operation.
- **Save seed while increasing yield** – thanks to our widespan controlled traffic system, you use less seed but still get higher productivity.
- **Wide-span farming made easy** – our 14-meter working width covers more ground in less time, letting you work faster than ever before.

And let's talk about **harvesting** - because with NEXAT, it's **next-level**. You'll be running **50-foot headers**, making your harvests more efficient than ever.

A MASSIVE THANK YOU TO THE COMMUNITY

Bringing NEXAT to Farming Simulator 25 wouldn't have been possible without the fantastic collaboration with GIANTS Software - but just as importantly, without you, our community. From the very beginning, GIANTS Software showed a deep curiosity about our modular concept, wide-span approach, and the efficiency of our system. Farming Simulator is all about realism and innovation, and NEXAT fits right in. Throughout our work together, the GIANTS team experienced several 'aha' moments—seeing firsthand how NEXAT transforms farming efficiency by combining multiple tasks into a single operation. Their dedication to detail and authenticity was outstanding. From perfecting the wide-span workflow to simulating the advantages of controlled traffic farming, they made NEXAT feel right in the game.

But this journey wasn't just about us and GIANTS Software - it was also about you, the players. When we first saw fan-made mods inspired by our system, we were honored and humbled. Your enthusiasm showed us that NEXAT belongs in Farming Simulator.

Now, it's **official: You can finally farm with NEXAT in Farming Simulator 25!**

Farming Simulator 25 is available now for PC, Mac, PlayStation®5, and Xbox Series X|S. Get the Year 1 Season Pass to unlock the NEXAT Pack, plus two additional content packs and a major expansion - saving up to 25% compared to purchasing separately.

Get ready for the next generation of farming—now, also in Farming Simulator 25!

NEXAT was founded in 2017 by Felix and Klemens Kalverkamp and is based in Rieste, Germany. With more than 140 employees, NEXAT is one of the most innovative agricultural machinery manufacturers worldwide. The crop production system developed by NEXAT is already operating on three continents due to global demand. The NEXAT system enables maximum yield potential to be developed with maximum conservation of soil and resources. In doing so, the young company draws on the more than 50 years of expertise of the Kalverkamp founding family, which is expressed in numerous product developments and awards in agricultural technology. The gold medal for the NEXAT system in 2022 (Agritechnica Innovation Award) and the Agrifuture Concept Award (Agritechnica, DLG, 2023) reflect NEXAT's innovative strength. Information & contact people for the NEXAT system can be found on the website www.nexat.de/en/
